#### **Blue Day Sparks Creativity and Joy at Dominic Savio Kindergarten, Nerul**

Dominic Savio Kindergarten, Nerul, celebrated Blue Day with the Nursery section on Friday, 19<sup>th</sup> September, 2025. The programme aimed at familiarising young children with the colour blue and encouraging learning through creative expression.

Students came dressed in different shades of blue, creating a vibrant atmosphere across the classrooms. The rooms were decorated with blue-themed cut-outs that added to the visual appeal of the event.

Children participated in a painting activity that highlighted the colour of the day. They also brought blue-coloured objects from home, including toys and accessories. This activity helped children identify and differentiate shades of blue through objects familiar to them.

Teachers conducted a short show and tell activity on blue coloured objects, where students spoke about what the colour reminded them of. This activity supported language development and encouraged children to share their thoughts with confidence.

The celebration also emphasized experiential learning, as students engaged all their senses in recognising and applying the colour blue. Such events contribute to the holistic development of children, integrating observation, expression, and creativity into classroom learning. The enthusiastic participation of the students reflected their excitement and curiosity, making the day both memorable and meaningful.

Blue Day at Dominic Savio Kindergarten was an engaging blend of fun and learning, reinforcing the importance of colours in early education while creating lasting impressions in the young minds.
