Nursery Learners Explore Shades of Red-on-Red Day at Don Bosco Nerul

Don Bosco Senior Secondary School, Nerul

Red Day Celebration | July 25, 2025

The nursery section of Don Bosco Senior Secondary School, Nerul, celebrated Red Day on July 25, 2025, with a range of colour-themed learning activities aimed at enhancing early childhood development.

The celebration was designed to help children identify and relate to the colour red through engaging and age-appropriate experiences. Classrooms were decorated with red elements, creating a bright and inviting atmosphere for the young learners.

Children participated in a variety of red-themed activities including dress parades, sensory exploration tables, and art-based tasks. They brought red items from home and confidently spoke about them in front of their peers, helping to build vocabulary and communication skills.

The day's activities focused on:

- Colour recognition through visual and tactile materials
- Language development via picture talk and vocabulary building
- Fine motor skills through craft-making and colouring activities

Children enjoyed working on red gelatin paper viewers and colouring worksheets featuring red objects. These hands-on experiences provided opportunities for creativity and skill reinforcement.

The event was graced by the presence of Father Shekar Mariadas, Vice Principal and Administrator, along with Mrs. Mahek Khan, Supervisor for Foundational Stage-I. Their support, along with that of the teaching staff, added to the day's spirit of encouragement and learning.

The celebration concluded with cheerful take-home crafts and vibrant classroom displays.

Red Day served not only as a visual and sensory delight for the nursery children but also supported holistic learning in a joyful, engaging manner.
