

DON BOSCO SENIOR SECONDARY SCHOOL

Nerul, Navi Mumbai

By Tr. Shiny

The Science Exhibition – INNOVISTA 2025, themed “Innovate for a Sustainable and Inclusive Future,” was successfully organised at Don Bosco Senior Secondary School, Nerul, on 15th November 2025. The exhibition aimed to promote scientific thinking, creativity, value integration, and future career awareness among students from Classes I to XI.

The exhibition began with the school prayer, setting a solemn and reverent tone for the event. This was followed by the lighting of the lamp by the invited guests of honour and all the dignitaries, symbolising the spreading of knowledge, wisdom, and enlightenment. The exhibition was then formally inaugurated with the ceremonial ribbon-cutting, marking the official opening of INNOVISTA 2025.

The exhibition brought together the best work of students from Classes I to XI, emerging from two preparatory rounds. Across the school, students had first engaged in intensive research on STEAM concepts, values, and career pathways, preparing detailed displays that built their teamwork and analytical skills. This was followed by class-level model-making, where each class was divided into five groups, and all groups created working models, innovative prototypes, and visually appealing scientific displays. The most impressive exhibit from each class was shortlisted for the final INNOVISTA showcase.

On the exhibition day, the Assembly Hall transformed into a vibrant space filled with scientific models, eco-friendly innovations, robotics, engineering designs, environmental systems, and career-linked displays. Students confidently explained their work to visitors and judges, demonstrating clarity, originality, and an impressive understanding of concepts. The eminent judging panel—comprising the Principal of Podar International School (Cambridge), a BRC Scientist, the HOD of Science from Podar International school, and an IT representative—evaluated the exhibits and praised the students for their innovation, presentation skills, and thoughtful integration of values and sustainability.

INNOVISTA 2025 stood out as a meaningful platform where scientific inquiry, creativity, values, and future career aspirations came together. The exhibition highlighted the school’s commitment to nurturing young minds who think critically, work collaboratively, and innovate responsibly. It was an inspiring and proud moment for the entire Don Bosco school community, reflecting the true spirit of excellence and holistic education.
