

DON BOSCO SENIOR SECONDARY SCHOOL, NERUL

REPORT – CAREER GUIDANCE PROGRAMME BY CLASS IX-A

Date: 18th June 2026

By: Tr. Sumitra Adhikari

Don Bosco Senior Secondary School has been known for its innovative ways to ensure holistic development of child that includes Academics, Creativity, Confidence and Collaboration. The inclusive approach of teaching helps in adequately equipping young students so that they are able to take advantage of future opportunities based on merit. One such innovative programme is career guidance program, which provides a window to look at changing career landscape with insightful information about a spectrum of future career pathways.

Students of Class IXA picked up an interesting and most critical career stream 'Careers in Environmental Sciences and Conservation' as overarching theme for their programme for the students from IX – XII.

We all know that the Climate Change has been impacting the world around us since last few years. These changes create challenges that affect all of us. Challenges create opportunities and therefore the domain of Environmental Science & Conservation is emerging with lucrative career options for the youth.

Akshit and Ridhi set the context for an insightful skit 'Nature Mai Future' with thought provoking discussion around careers in an uncommon field of Environmental Science & Conservation. The skit was followed by a Video and a detailed presentation about the subject, career opportunities, available courses at graduation and post-graduation levels, some of the universities. The class also gave a visual demonstration of some of the crucial roles through CAREER LADDER show and role plays.

Whole of the class worked with a cohesive manner. Though actual actors were only few but everyone contributed to the best of their capabilities be it conceptualizing the topic, planning, backdrop decoration, creatives, presentation, coordination, ground work etc. Every member of the Don Bosco Family, from the management to the support staff, provided necessary support in a collaborative manner throughout the event.

Principal, **Mrs. Kalyani Chaudhuri** appreciated the concept and the team efforts in conducting the program and encouraged students to contribute towards making the environment clean and green.

The programme concluded with vote of thanks and the school anthem. The inclusive approach of the programme strengthened the collaborative spirit and the bond amongst the students demonstrating that every role is vital to the overall success of the Programme.
