

## **DOMINIC SAVIO KINDERGARTEN, NERUL**

### **Field Trip Report**

**By Tr. Sumaiya**

Don Bosco Senior Secondary School, Nerul

#### **Visit to Konkan Krishi Vikas Pratishthan, Kharghar – August 12, 2026**

The JR.KG children of Don Bosco School, Nerul, visited Plant Nursery, Kharghar, on Wednesday, August 12, 2026. A total of 119 students, accompanied by five teachers, eight parent volunteers, and one support staff member, participated in the trip. Brother Royston addressed the children with a School Prayer and gave blessings.

The students left the school premises at 9.15 a.m. in three buses and returned safely by 11.45 a.m. At the nursery, they enjoyed walking through the greenery and observing a wide variety of plants, including flowering plants, medicinal herbs, saplings, and indoor decorative plants. Teachers explained the importance of sunlight, water, and care in plant growth, and the children eagerly observed how plants are nurtured in different sections of the nursery.

The students also had an enriching experience as they explored the different types of plants. They were curious to see how saplings grow and learned that each plant requires proper care. Such field trips in the early years are important as they provide real-life learning beyond the classroom and nurture in children a love for nature.

The visit helped the students gain first-hand knowledge about plants and their uses. It also encouraged them to develop a sense of responsibility towards caring for the environment.

The field trip to Plant Nursery was both educational and enjoyable, leaving the children with valuable learning and a memorable experience.
