VALUE EDUCATION PROGRAMME – CLASS III A & III B
18th AUGUST 2026

THE SPACE SCAVENGER HUNT

TEACHER'S INCHARGE: Tr. Sheeba Ratheesh &Tr. Smita Patil

As part of the Value Education Programme, the students of Classes III A and III B of Don Bosco Senior Secondary School, Nerul, presented an informative and engaging programme on the theme "The Space Scavenger Hunt" on 18th August 2026. The programme took the audience on a meaningful journey through space while highlighting an important message about protecting our planet Earth.

The programme commenced with a warm welcome and an attractive opening dance featuring students dressed as stars, planets, astronauts and rockets. Through confident narration, role play, dialogue, music and creative performances, the students presented the alarming problems faced by Earth, including pollution, deforestation, global warming and the exhaustion of natural resources.

A major highlight of the programme was the exciting space mission in which the young explorers travelled to the Moon, Mars and Venus in search of another place where humans could live. Through their exploration, they discovered that the Moon has no air and water, Mars is extremely cold and difficult for life, and Venus is too hot with poisonous air. The students finally realised that there is no other home like Earth and that it is our responsibility to protect it.

The programme beautifully conveyed the message of environmental responsibility through the Earth Realisation scene, an Earth Dance, a research video, an interactive Space Quiz and the energetic "Save Our Earth Rap!". Students encouraged everyone to adopt simple but meaningful actions such as saving water, planting trees, reducing plastic, using clean energy and keeping the surroundings clean.

The programme also highlighted important Sustainable Development Goals, including SDG 13: Climate Action, SDG 6: Clean Water and Sanitation, SDG 11: Sustainable Cities and Communities, and SDG 12: Responsible

Consumption and Production. The enthusiastic participation, teamwork, creativity and confident presentation of the students reflected their sincere preparation and understanding of the theme.

The programme successfully achieved its objective of helping students understand that Earth is our only home and that protecting it is the responsibility of every individual. The positive response from the audience and the active involvement of the students made the programme a memorable, meaningful and enriching learning experience. The programme was efficiently coordinated under the guidance of Tr. Sheeba and Tr. Smita, whose dedicated efforts ensured the smooth planning and successful execution of the event. It concluded with the Vote of Thanks and the School Anthem, leaving the audience with a powerful message: “Don’t search for another Earth… Protect the one we have.”
